

SCIENCE ADVENTURE Squad

Science Adventure Squad is the perfect after-school club for curious minds! Each Monday or Wednesday, students dive into hands-on science adventures featuring food creations, slime and squishy design, building and creating, and exciting STEM challenges! Every session brings something new, giving kids the chance to experiment, invent, problem-solve, and get a little messy along the way.

Join us for a semester filled with creativity, discovery, and hands-on FUN—where science feels like an adventure!
